

Login to Aeries Parent Portal

If your student is currently a fifth grader you will need to click on the Change Student tab and click on your student's name that has [PRE-ENROLLED] next to it.

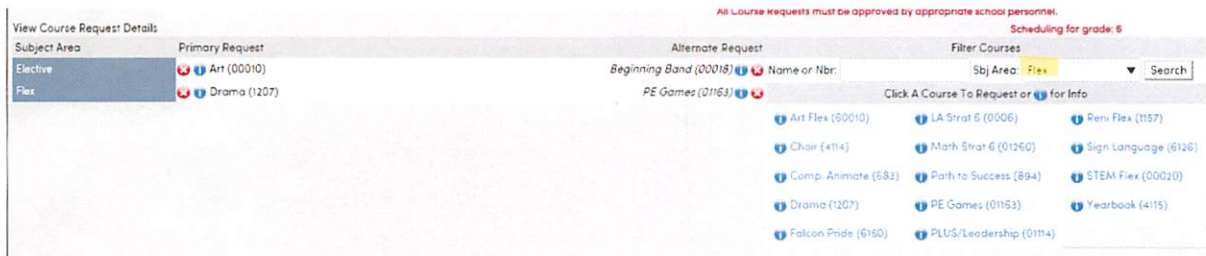

Once you have switched to the pre-enrolled student you then will be directed to a new home page. Click on the Student Info tab. This will bring up a drop down selection. Click on Course Requests Entry. This brings up where you can select courses. You can filter Elective and Flex Classes by utilizing the drop down next to the search button on the right.

Please select your elective choice. The first elective you chose will be the main choice. Please select an alternate choice by clicking the Add Alternate button located to the right of your initial selection.

After selecting you elective, please use drop down to change courses to Flex options. You will then make your initial Flex choice and your alternate.

Once you have completed your selections you may log out of your Aeries account.
